

## Enwave Chicago Introduces New Web Site

Now you can quickly jump online to find out more about [Enwave Chicago](#), your “more than cool” district cooling service provider.

Check out our new scalable [web site](#) – works great on mobile too – to learn

- how our system works – in our plants and your building,
- the benefits district cooling offers you and our community,
- Enwave Chicago’s history of growth,
- about the customers we serve, and
- the latest news on Enwave Chicago, our service area and the district cooling industry.

You’ll find maps, customer profiles, a newsletter archive, quiz questions and more as you investigate the site. And if you have questions or want more information, just drop us a line on our [contact page](#). We want our web site to help start conversations with our customers and open doors to information exchange.

When we became a part of the Brookfield family of companies in August 2014, we promised we’d be making some changes. Our web site is one of them! Please help us spread the word about the site by sharing the link [enwavechicago.com](#) with your colleagues, tenants and residents. Thank you for your business.

## New Business Development Manager Hits the Ground Running

Jim Ryłowicz, Enwave Chicago's new business development manager, joined the company in late March. He's been filling his days meeting with customers, contacting prospective customers, providing customer service, and coordinating new service connections.

Jim is no stranger to the cooling business – or Chicago. He previously worked in the controls group for a local HVAC distributor and has been involved in commercial building commissioning, working with consulting engineers and contractors.

“Enwave Chicago is unique,” he says. “That’s really what drew me here. I like the sustainability the system offers, and I’m eager to help customers realize those benefits. It helps that I can draw on my HVAC experience and that I’m well-acquainted with downtown. I grew up just west of here and have worked in the area my entire career.”

Jim holds a Bachelor of Science in mechanical engineering from the University of Illinois at Urbana-Champaign and a law degree from DePaul University College of Law.

He may be reached at 312.447.1600 x17,
